IMPORTANT SAFETY INFORMATION

Systemic exposure of phenylephrine may cause elevations in blood pressure. The most commonly reported ocular adverse reactions at ≥2% are eye irritation, posterior capsule opacification, increased intraocular pressure, and anterior chamber inflammation. OMIDRIA must be added to irrigating solution prior to use.

OMIDRIA HAS PASS-THROUGH STATUS

- Under the Outpatient Prospective Payment System, pass-through products are paid separately (i.e., in addition to the packaged procedural payment) by Centers for Medicare & Medicaid Services (CMS). OMIDRIA use in cataract and lens replacement surgery for patients with Medicare Part B coverage is separately reimbursed until October 1, 2020

A UNIQUE PERMANENT BILLING CODE FOR OMIDRIA: J1097*

- OMIDRIA is reimbursed per mL; therefore, providers should always use 1 mL as the billing unit and bill for 4 units
- ASCs and HOPDs use this unique permanent HCPCS code to bill CMS and other payers for separate payment

ASCs=ambulatory surgery centers; HOPDs=hospital outpatient departments; HCPCS=Healthcare Common Procedure Coding System

* Individual plan coverage, payment, policies, and procedures vary and should be confirmed by the facility. Omeros does not guarantee reimbursement.

OMIDRIA DILUTION AND STORAGE

Prior to dilution
- Store at 20°C to 25°C (68°F to 77°F)
- Protect from light

Easy to integrate into routine operating procedures
- Add preoperatively to irrigation solution
  - One 4-mL single-patient-use vial to 500 mL ophthalmic irrigating solution

Do not use if the solution is cloudy or contains particulate matter

After dilution, product can be stored:
- Up to 4 hours at room temperature
- Up to 24 hours if refrigerated

Talk to your OMIDRIA representative or reimbursement specialist today or call 1-877-OMIDRIA (1-877-664-3742) 9 am–5 pm ET, Monday–Friday

Omeros continues to support access to OMIDRIA through this Comprehensive Patient Assistance and Reimbursement Program.

IMPORTANT SAFETY INFORMATION

Systemic exposure of phenylephrine may cause elevations in blood pressure. The most commonly reported ocular adverse reactions at ≥2% are eye irritation, posterior capsule opacification, increased intraocular pressure, and anterior chamber inflammation. OMIDRIA must be added to irrigating solution prior to use.
ORDERING INFORMATION FOR OMIDRIA
